

ALWAYS BE PREPARED WITH MEDITE TRICOYA

THE SCENARIO: The Scout hall in Walthamstow required a material for simplifying and unifying the building's fascia. The buildings façade required a material with very hardwearing and low maintenance weather resistant characteristics.

THE SOLUTION: A panel was required that could stand the test of time in an external application, potentially in harsh weather conditions. Having a precise geometric design for the façade, it needed to be produced onsite to fit over the existing structure. Medite Tricoya was chosen because it is relatively lightweight, can be machined onsite and provides a smooth finish for painting.

THE RESULT: Medite Tricoya panels were selected by Klassnik Corporation, and installed over the existing garage structure, creating a smart, white façade, forming the base for paint stencilled or vinyl signage. The panels were also transformed into large fascia's and installed in patterns derived from the Scout logo.

“ The 50 year guarantee gives us reassurance that the new façade will last for many years to come. ”

Tomas Klassnik,
 Klassnik Corporation,
 Architect
