

**MEDITE TRICOYA EXTREME USED AS A SUSTAINABLE FAÇADE PANEL**

**THE SCENARIO:**

A large scale housing maintenance project in the Nijmegen region , Netherlands, meant that façade panels containing asbestos needed to be removed. Burghouts Company required a lightweight, dimensionally stable, maintenance free material that could be used to replace the façade .

**Close up of the detail that can be achieved with Medite Tricoya Extreme**

**THE SOLUTION:**

Medite Tricoya Extreme fulfilled all the projects' requirements. The raw panel is modified through an acetylation process, giving outstanding dimensional stability and durability using a non-toxic environmentally compatible process.

**THE RESULT:**

Medite Tricoya Extreme was specified and replaced the asbestos cladding panels. Choosing this extremely durable material, coupled with the Teknos coating system, ensures the façades will be maintenance free for at least 10 years. A total of over 5,800 m2 of material was delivered.

**"By choosing Medite Tricoya Extreme, maintenance costs could be halved."**  
**Bennie Weverink, Manager  
 Burghouts Company**
