

MEDITE® TRICOYA® AND ACCOYA® COMBINE FOR SPECTACULAR FLOORING

THE SCENARIO:

Temporary luxury tents at Ladakh in the Himalayas required a floor constructed of removable panels, as the tents will be relocated every 3-4 months. With the monsoon weather and tropical dry season, Ritikaa wood needed a material that would withstand the extreme change in the weather patterns and temperature.

THE SOLUTION:

With Class 1 durability and exceptional dimensional stability, both Medite Tricoya and Accoya allow the floor boards to resist shrinkage and swelling. This allows the removable panels to be used time and time again.

THE RESULT:

Medite Tricoya panels and Accoya wood were specified due to the intense humidity and moisture in India's extreme and variable climate. The Medite Tricoya panels have been used as a base on which Accoya boards were glued to make a flooring project.

" Using both products ensured good dimensional stability and durability performance in the humid environment. "
